

Magnetic Door Holders

Ancillaries

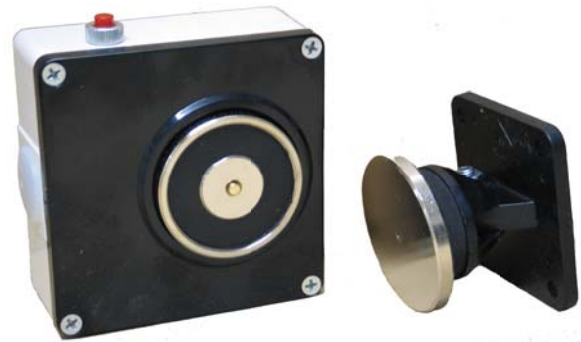

Notifier by Honeywell has a variety of magnetic door holders to suit most requirements.

The MDH 1350 made from high quality die-cast aluminium and finished with a black powder coat, they are robust, attractive and compact, yet maintain a large contact area.

Magnetic door holders are used to keep fire/smoke doors open and release them in the event of a fire. They consist of two parts, the electromagnet and the counter-plate. The electromagnet is wall mounted and the counter plate fitted to the door.

This door holders' minimal current consumption, heavy duty anvil and holding capacity from 25 to 50 kilograms is adequate to retain most swinging or sliding fire doors.

Notifier Inertia Fire Systems also supply a momentary release switch on a standard gang plate to allow release of fire door from an easily accessible location.

MDH1350

**Momentary
Release Switch**

Specifications

	MDH1350
Operating Voltage:	24VDC
Current Consumption:	60mA
Holding Force:	25 - 50 Kg
