

DESK TOP PAGING MICROPHONES

General

NOTIFIER's MIC/1D and MIC/4D desktop paging consoles provide single or multi-zone (up to 4 zone) remote paging function to the DA series building occupant warning system.

These compact yet robust remote paging consoles with gooseneck microphone allow an operator to easily utilise the DA-series building occupant warning system to make announcements to selected areas within the building.

Connection to the remote console is via CAT5 (or similar) cable which allows for simple and economical installation. This CAT5 cable provides power, audio and switching connections and the high level balanced audio line allows transmission up to 300m without interference.

MIC/1D - 1 zone paging console features

- Single zone paging.
- Robust heavy design.
- Dynamic cardoid gooseneck microphone.
- Page/Off/Lock switch.
