Addressable Mounting Bases

**B501AUS Standard Plug-in Base**

**General**

The B501AUS base provides a method of installing FlashScan® and CLIP protocol addressable detectors on to either a Notifier AFP-2800 or AFP-2802 Fire Indicator Panel in any application.

Intelligent detectors can be mounted in either standard or isolator bases to meet specific requirements.

**Features**

**Standard base**

- Fits all addressable sensors.
- Large cable entry
- Cable connection markings in the mould
- Tamper-proof lock.
- Simplified in-line mounting points
- Simple installation.

**Approvals**

Evaluated by CSIRO ActivFire as a compatible device for AFP-2800. (See afp-1459)

**Specifications:**

- Diameter: 102mm
- Height: 18.8mm
- Mounting: Centres in line
- Temperature Range: -20°C to 66°C
- Humidity Range: 10% to 93% RH non-condensing

**Ordering Information:**

- FG-01-061 B501AUS Standard base
- FG-01-001 B501A-W White base
- FG-01-063 B501AP-BK Black base
B524IEFT Isolator Base

General

Notifier’s isolator base model B524IEFT is designed for use with the complete range of addressable analogue sensors.

The isolator base prevents an entire communications loop from being disabled when a short circuit occurs.

It achieves this by isolating the part of the loop containing the short circuit from the remainder of the circuit.

The base will automatically restore the entire loop when the cause of the short circuit is corrected.

Up to forty Flashscan™ devices and/or twenty Flashscan™ modules may be installed between two isolator bases.

Features

Isolator base

- Fits all addressable sensors.
- Colour coded terminals
- Low current draw.
- Tamper-proof lock.
- Multiple hole centres.
- Simple installation.

Specifications:

- Operating Voltage: 18 - 28.5VDC
- Standby Current: 100μA
- Temperature Range: -30°C to 70°C
- Humidity Range: 0% to 95% RH non-condensing
- Diameter: 104mm
- Base Height: 26mm
