

July 13, 2005

Dear Valued Customer,

Notifier Inertia is discontinuing several fire alarm control panels that were, in some cases, introduced more than a decade ago. While these have been very successful product offerings, new Australian standards and more up-to-date alternatives force us to announce their discontinuance. The discontinued products are:

Product	Suggested Substitute
1010 FIP	AFP-2800
2020 FIP	AFP-2800
AFP-100	AFP-200 or AFP-2800
AFP-400	AFP-200 or AFP-2800

It is our intention to manufacture and stock repair boards (RBs) for the discontinued panels until the cost of circuit board components is prohibitive or piece part components become obsolete. Please contact your Regional Sales Manager or Technical Support if you have any questions regarding this notice.

Sincerely,

A handwritten signature in black ink, appearing to read 'A. Azizi'.
