

Date: 2nd Aug, 2007

Affected Products: 1372 - MIM/8 8 zone mimic for ZJ-1000 / IFS-008 / IFS-888

Dear Valued Customer,

Notifier Inertia is discontinuing MIM/8 from production, while this has been very successful product offering, more up-to-date alternatives force us to announce its discontinuance.

Although no direct replacement will exist we recommend the use of an IFS-2608 where a mimic display is required.

It is our intention to manufacture and stock repair boards (RBs) for the discontinued products until the cost of circuit board components are prohibitive or piece part components become obsolete. Please contact your Regional Sales Manager or Technical Support if you have any questions regarding this notice.

Sincerely,

James Edwards
Product Manager
