

South Wharf, Melbourne

Superbly located on the banks of the Yarra River is Melbourne's latest offering in architectural ingenuity, the Melbourne Convention and Exhibition Centre (MCEC). The MCEC is the first and only '6 Star Green Star' environmentally rated convention centre in the world and is the largest and most flexible convention and exhibition facility in Australia.

This venue represents world leadership in best practice, innovation and sustainability and continues to raise standards to new heights in technology, imaginative catering and service options.

Thirty-two meeting rooms of various sizes, a grand banquet hall, a spectacular entry level foyer and a 5500+ seat state-of-the-art plenary that can be divided into three self-contained, acoustically separate theatres, offers clients unlimited options in event planning.

This new convention centre with its sophisticated audio visual and communications equipment inbuilt to every one of these rooms, relies on **Notifier by Honeywell's** addressable AFP-2800 fire detection system to protect against fire and an ONYXWorks™ Graphic Control Station to provide a single point of control for the fire system throughout the building.

The large open spaces of the plenaries are protected using VESDA - very early warning aspirating smoke detection to ensure that in the unlikely event of a fire the earliest possible warning is provided to the occupants.

The critical communications/server room is protected by a Notifier fire suppression control panel controlling an inert gas suppression system.
